Willkommen in Houghton!!!

Ich freue mich, dass Sie an der Technischen Universität Michigan weiter Deutsch lernen möchten.... I am pleased that you are going to continue your study of German and hope that I can help you achieve a reasonable mastery of German during the time allotted this semester.

Course Goals: All four language skills (speaking, listening comprehension, reading and writing) will be taught equally and at the end of the course you should be able to communicate in German using more advanced structures. German culture will also be covered.

All work in this course will stress the use of German as a means of communication.

Inhalt und Aufbau des Kurses

Role-playing, worksheets, etc. will be used in class to emphasize the goals of each chapter. Often there will be pair and group work. The grade will include homework from the Workbook and the Lab Manual, quizzes and exams, class participation as well as written and oral practice, and at the end, an “Oral Exam” (more about that later). Since the study of language involves using it frequently, class participation will be extremely important. Oral participation assumes regular attendance in class.

After each chapter, there will be a chapter exam. The written part of chapter exams will be taken online and will be submitted electronically on the scheduled dates. The Oral Component of the Exams will be at the beginning of class on the scheduled dates. Exams are always announced and will always include a review session the class before the exam where I will go over the chapter and answer any questions that you may have. You can also use the self-tests to review for exams.

Quizzes will also be taken online and will be submitted electronically.
The Workbook assignment is normally due by the beginning of class of the review session. The Lab assignment is normally due the day of the Exam. Both the workbook and the lab will be found online on the iLrn website and will be submitted electronically.

Other homework may also be assigned during the study of each chapter. I will be communicating mostly through Announcements on Canvas and by email. Please make sure that your settings on Notification Preferences on Canvas for Announcements is set on “Notify Me Right Away”.

Alles Gute für dieses Herbstsemester—und viel Spaß!

Orientierungshilfen zum Lernen von Deutsch als Fremdsprache

A chapter syllabus (Kapitelplan) with the goals for each chapter is available on Canvas. I suggest that you get a 3-ring binder or a folder to keep your syllabi, corrected written assignments and other materials together.

How to Succeed in Learning German

Learning a language is different from study in most other academic areas such as sciences and engineering. It involves both the comprehension of ideas and the mastery of practical skills (listening, reading, speaking and writing). The latter requires intensive daily practice. Those of you who have learned to play a musical instrument or become proficient at any sport can appreciate that fact—knowing that one will be rewarded with a great feeling of success! Regular attendance in class and regular active participation is a required part of your work. Preparation of each daily assignment in advance of the class meeting, where you will get structured, guided practice in using German, is necessary for your own success in learning as well as for the success of the entire group’s working together.

As a rule you will have homework assigned for almost every class meeting. Written assignments are to be submitted at the start of the class period for which they are scheduled. Homework submitted after the start of class will be corrected, but only for half credit. Do not skip class because of less than complete preparation. This will deprive you of essential knowledge and experience that cannot be made up.

How much time should you spend studying German? The answer to that depends on many variables, e.g., your background, your native ability, but a good rule of thumb is: one hour (or at the most two hours) outside class for every hour in class. If you spend that amount of time each week, spread over the entire week (not all in one day or during one night before a test!), actively studying (not just sitting there looking at the book!), you should achieve the goals of this course successfully and also be rewarded with a great feeling of intellectual enrichment.
